

# Chloé Brady

Omaha, NE | (402) 359-7180 | Chloesa@icloud.com | linkedin.com/in/ChloeJBrady

## ABOUT

Computer Science senior with hands-on software engineering experience designing, developing, testing, and troubleshooting production data pipelines and AI-powered search tools. Strong foundation in secure coding practices, automation, and modern development tooling (Git, CI/CD, cloud infrastructure), with academic depth in machine learning, databases, and data structures & algorithms.

## EDUCATION

**Florida State University**, Tallahassee, FL

*Expected Graduation: May 2027*

B.S. in Computer Science, Minors in Chemistry & Mathematics | GPA: 3.94 | President's List

Kappa Delta Sorority · Women in Computer Science · Girl Scout Committee

## TECHNICAL SKILLS

**Languages:** Python, C++, SQL, Java

**Engineering Practices & Tools:** Git, CI/CD (Azure DevOps, Octopus Deploy), Kubernetes, Unit Testing & Debugging, Agile/Sprint, RBAC & Secure Credential Handling (Azure Key Vault)

**Libraries/Data Tools:** pandas, NumPy, scikit-learn, matplotlib, seaborn, BeautifulSoup, Snowflake

**Concepts:** Software Design & Testing, Machine Learning, OOP, Data Structures & Algorithms, Database Design, Parallel Programming, Networking

## EXPERIENCE

**Farm Credit Services of America**, Omaha, NE — Data & Analytics Intern

*May 2026 – Aug 2026*

**Snowflake Cortex AI Agent Project**

- Designed, developed, and deployed a Cortex AI Agent and Search Service in Python and SQL, making data lineage across a 50+ source-system cloud data warehouse (Snowflake) more understandable, accessible, and searchable via natural language
- Built, tested, and troubleshooted an automated Python pipeline (Kubernetes, Azure DevOps) that clones repos, chunks files, and loads into Snowflake via a two-layer CDC approach, cutting search-index noise ~76% by querying live tables instead of raw SQL files
- Used AI-assisted coding tools to accelerate Python development, validating all AI-generated code through manual review, testing, and debugging before deployment
- Debugged inconsistent agent responses by pairing deterministic SQL retrieval with semantic search, eliminating answer inconsistency
- Followed enterprise standards for RBAC (role-based access control) and secure credential handling (Azure Key Vault), with CI/CD deployment via Azure DevOps and Octopus Deploy

**Data Warehouse & BI Support**

- Collaborated cross-functionally, including 1:1s with multiple VPs, to translate business requirements into technical data flows
- Improved loan-to-dividend traceability for the Patronage domain by adding loan number attributes across the source, staging, and reporting layers of the Cloud Data Warehouse
- Participated in the full BI development lifecycle, sprint standups, tech specs, and peer code reviews, with CI/CD deployments through Azure DevOps and Octopus Deploy

**City of Omaha**, Omaha, NE — Infrastructure Data Intern

*May 2023 – Aug 2023*

- Logged structural and geospatial data for 40+ sewer access points per day; analyzed acoustic data from SL-RAT technology to evaluate pipeline health and prioritize repairs

**Legal Aid of Nebraska**, Omaha, NE — Law Clerk Intern

*May 2021 – Aug 2021*

- Managed intake data and case files for low-income clients in a compliance-focused legal environment

## ACADEMIC PROJECTS

**Data Science & Machine Learning**

- Built a text analysis pipeline using web scraping, preprocessing, and TF-IDF cosine similarity; visualized results with heatmaps
- Applied PCA, K-Means clustering, and KNN classification to real-world datasets; developed, tested, and compared Logistic Regression and Neural Network models

**Parallel Programming (Python)**

- Implemented a statistics engine using serial, multithreaded, and multiprocessing approaches; debugged and resolved race conditions and evaluated performance across execution models

**Database Design & SQL**

- Designed relational schemas using ER modeling and normalization (BCNF, 3NF); as part of a group project, built and tested a SQLite-based database system with full CRUD operations

## INVOLVEMENT & LEADERSHIP

**FSU First Year Study Abroad**, Valencia, Spain

*Aug 2023 – Jul 2024*

- Completed three semesters abroad, earning a 4.0 GPA while integrating into local Spanish culture
- Arranged solo and group travel across 25 countries, applying budgeting, logistics, and problem-solving skills
